Date: Tuesday, April 23, 2013 11:29:26 AM

See below, FedEx delay in sample shipment.

Good Morning Kristie,

The sample volume shipped last night to TA Tallahassee for the requested 8141B analysis has been delayed at the Fed-Ex hub in Memphis. We are in contact with Fed-Ex to determine if the samples can still be delivered to the Tallahassee lab today or if tomorrow morning is the earliest the delivery can be made.

We apologize for the inconvenience and will keep you apprised as the situation develops.

Please let me know if you have any questions or concerns.

Thank you,

LISA B. URIELL
Project Manager

Subject: REVISED: Sample Login Confirmation for 280-41262, West Ammonium Explosion

Hello,

Please find the attached revised sample confirmation documents. The sample confirmation was revised to reflect the 8141B analysis that TestAmerica Tallahassee supports and cancel the 8141A analysis that has been phased out.

Please let us know if you have any questions or need anything else.

Thank you.

ELIZABETH EICHELBERGER

Subject: Sample Login Confirmation for 280-41262, West Ammonium Explosion

Attached, please find the sample login acknowledgment, receipt checklist and chain of custody for the ten soil samples and MS/MSD received at the laboratory on 4/21/2013.

The samples were received in acceptable condition at temperatures of 3.1 and 2.3 degrees C.

Receipt Discrepancies: None

Please note: The samples were delivered to the laboratory on the evening of 4/21/2013 by the TestAmerica lab courier and placed in the laboratory walk-in cooler. As the sample receiving supervisor was not present at the time of delivery, the received signature of 4/22/2013 at 08:00 reflects the beginning of business hours of the day the samples were logged. Chain of custody was preserved from the receipt of the samples at the airport on 4/21/2013 at 20:40 and all custody seals were intact.

Thank you.
Elizabeth
